13-182-0
For 66 type terminals- reversible punch or punch & cut

13-183-0
For 110 type terminals-reversible punch or punch & cut

Use -1 for Display Package

Since modern twisted pair cabling must be expected to carry high signal rates, it is necessary to avoid stressing the wire. Tight 90-degree bends are not permissible, and any tie-wraps or other securing straps must not be cinched excessively tight. Care should be taken to avoid routing cables within 18 inches of electrical noise generating devices such as transformers and lighting ballasts. Please see our selection of hook and loop cable ties which are suitable for securing bundles of Cat 5 or Cat 5E cables.

CABLE STRIP TOOL

13-185-0
Universal stripping tool for round or flat Cat 5 cable.
Use -1 for Display Package

ECONOMY PUNCH-DOWN TOOL AND CABLE STRIPPER

13-189-0
